The attached questionnaire has been prepared by VBZ in consultation with EB to enable us to fill in certain important gaps in the information now available to us on the operations of Section VI 8 of the Eise and S.D.

It is realized that HENSEL may not be able to answer all of these questions but the questionnaire has been deliberately made broad enough to exhaust whatever relevant information he may have. The interrogator will necessarily have to use his own judgment as to how far any particular question can be pushed.

We are also anxious to have more details on the A-Scherle West at the Hague and on HENSEL's lectures on behavior of agents in enemy territory but it is our understanding that these matters have already been gone into with subject and are to be the basis for a forthcoming report.
